Brookstone Floor Tiles

**standard offering in all vinyl floor covering areas*

Brookstone by Nafco

BEAUTIFUL, DURABLE, AFFORDABLE

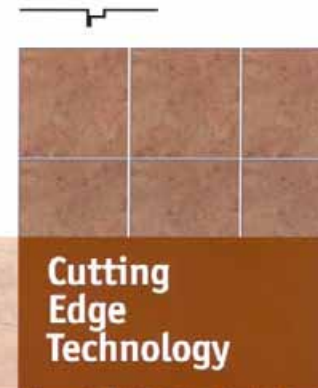

LUXURY TILE

Why Nafco?

• Exclusive Groufit™ system looks and feels like a true grouted floor. Most conventional LVT products have grout on all four sides, which leaves a visible, unrealistic seam right in the middle of the grout. Nafco tiles with Groufit only have grout on two sides of the tile so when they are fit together all you see is a beautiful, seamless floor.

- High-tech Tritonite finish with ceramic micro spheres guards against scuffs and scratches. No waxing, scrubbing or buffing required.
- Nafco floors are easy to repair compared to sheet vinyl, laminate, hardwood or ceramic.
- Looks and feels like real ceramic yet is quieter and warmer underfoot, making a Nafco floor more visually appealing to your end user.
- Nafco products are impermeable to moisture making them a more suitable choice than laminates for areas where moisture is always a concern, such as kitchens, baths, and utility rooms.
- Because our products are **Made In The U.S.A.**, they are available immediately – when you need them.
- Much lighter in weight, eliminating concerns about floor weight load.
- 15-year Extreme Performance Residential Warranty

Cutting Edge Technology

Ease of Installation

- Nafco approaches each opportunity with an open mind and a working knowledge of customized applications. We provide an on-site training process to ensure that proper installation techniques are in place, as we understand that each installation is unique. Once the process is in place, Nafco will provide an Annual Installation Procedure Audit to ensure quality.
- Nafco's Installation Technician can help reduce waste and create cost efficient layouts that maximize the benefits of the product.
- A Nafco specialist is available to assist you with any installation questions.
- Nafco products can be installed quickly and easily in a fast paced environment.
- Higher vinyl content creates a more flexible product. Because our products are more flexible than most competitive products, Nafco can be installed over foundations and sub floors that are less than perfect. Tiles are installed in an individual tile format and as a result, your waste factor will be significantly less than it would be if you were using sheet goods.
- If a tile ever becomes damaged, repairs can be completed in a matter of minutes, dramatically reducing costs of labor and material. In the event of a damaged tile, simply heat the individual tile and replace it!
