AS GREEN AS YOU WANT TO BE

All American Homes® is leading the charge in green and energy-efficient construction.

Modular is Naturally Green

Our modular building process allows us to minimize waste, up to 40% less than site-built homes. Lumber cut-offs, not large enough to use in the home, are used to heat our facilities during winter. Drywall scraps are provided to local farmers to improve their soil conditions, sawdust is made available for livestock bedding, and vinyl and other scrap materials are recycled.

Green Catalog

We offer the choices to help save energy and lower utility bills, to build your home of recycled or sustainable materials, and to improve the health and well-being of your family. With all of our environmentally friendly options available, we can help you reach your green objective.

GREEN OPTIONS AT A GLANCE

Simply by selecting All American Homes to build your next home, you have already started the path to **green** building. Below are just a few more ways that we can help you reach your **green** objectives.

Solar Energy

Solar Panels & Solar Water Heating Systems

Water Efficiency

Tankless water heaters, low-flow faucets and showers, water-conserving toilets

Energy Efficiency

Icynene Insulation System[®], high efficiency heating and cooling systems, ENERGY STAR[®] appliances and lighting, Smart Living System[™]

Sustainable Resources

Bamboo and cork flooring, recycled countertops

Improved Air Quality

VOC-free paint, energy recovery ventilators

A SMARTER WAY

Controlled Environment

Every home is built inside our climate controlled facilities. You'll never have to worry about your unfinished home being exposed to the elements during the construction process. There are no weather related delays, and our crews don't have to rush to finish a job before bad weather hits.

Higher Quality Standards

With stringent quality control standards in place, our homes are engineered to meet or exceed local and state building codes. We even offer a limited 10-year structural warranty on our homes.

WAY TO BUILD™

Move in Faster

We can often deliver a home just weeks after receiving an order thanks to our Parallel Construction™—your on-site work is completed while your home is being built, simultaneously, in one of our construction facilities. Parallel Construction can also save you money with a shorter construction loan. A few weeks later, you could be moving into your new home. This efficiency is simply not possible with a site-built home.

BUILD YOUR DREAM HOME

SOLAR VILLAGE®

Solar Village is a collection of intelligent green homes that allow you to take control of ever increasing energy costs. A Solar Village home can generate low to zero energy bills, and uses eco-friendly construction methods and materials to protect the environment. Homes start as low as \$140 per sq.ft.*

MODERN

The Modern collection effortlessly blends modern architectural styling and functionality with environmental sustainability and energy efficiency. The unique styling of these homes is surprisingly affordable. Available Summer 2009.

AMERI-LOG®

Ameri-Log homes are the complete log home package. Made from cedar logs, the Ameri-Log collection offers airy and open rooms that showcase the natural warmth of wood. Homes start as low as \$84 per sq. ft.

TRADITIONAL HOMES

Our traditional homes feature flexible floorplans designed to fit any lifestyle and budget. Homes range from a 1,000 square foot ranch to a 3,500 square foot two-story. A host of energy saving features are also available on all our homes to save you even more money every month. Homes start as low as \$60 per sq.ft.*

**The stated cost per sq.ft. is for general reference only. Floorplan selection, options and other additions will increase the cost per square foot. Costs do not include property.*

WHAT OUR CUSTOMERS SAY

Bill & Eileen - Iowa

"Our builder and All American Homes® made the entire new home process an enjoyable experience. Our All American® home gave us the quality we required at a terrific value. We simply love our new home"

Susie - Ohio

"I have lived in my All American® home for 4-1/2 years and never had any problems with it. The quality of the home is fantastic, and I have even experienced a savings on my utility bills."

David & Joan – North Carolina

"From start to finish our All American builder made the project a delight. We are extremely pleased with our new home and would very confidently recommend an All American® home for anyone's next dream home."

A **SMARTER** way to build™

All American Homes® is one of the nation's leaders in systems-built (modular) residential construction. With a large network of independent builders serving most states, All American Homes can build your new home faster, with superior quality, and with green & energy efficient features.
